

PEDIATRIC NEUROPSYCHOLOGY SERVICES, PLLC

MICHELLE LURIE, Psy.D., ABPdN

17101 Preston Rd, Suite 240, Dallas, TX 75248 • Tel: (972) 248-3682

Your child's health is my utmost priority. **At all times Dr. Lurie will work to maintain the social distance requirements of 6 ft. as recommended by the CDC.** The office surfaces are disinfected several times a day. All test materials and computer keyboards are disinfected frequently during the day. A high quality air purifier is used in the office. Dr. Lurie will ensure that in one week there are never more than three children who enter the office, and never in the same day. **The patient and Dr. Lurie will use hand sanitizer frequently during the testing. Dr. Lurie will wear a face shield or mask at all times.** Most children seem to prefer the examiner wearing a face shield rather than a mask, but the parents make this decision.

Please check **one** choice below:

I understand that Dr. Lurie will wear a face shield during testing. She will maintain 6 ft. distance from my child whenever possible.

A face shield is not sufficient. Rather I request that Dr. Lurie wear a mask at all times rather than a face shield. She will maintain 6 ft. distance from my child whenever possible.
